

Model No: SR-3460
Sound Proof Crusher

Suitable for various plastic grinding, such as purging head, mold part ends, shaped material ends etc

Compact designed structure, adopt full enclosure insulation box, low noise

suitable for grinding various rubber and plastic, including injection molding, blowing molding, extending molding, and waste material central grinding. This series has compact structure, easy operation, knife replacement in quick and convenient, integral advancing force of gradually cutting design with good cutting efficiency, low noise.

Features:

- The knives made of imported top quality material, durable, long using life can be used repeatedly
- Added current relay, and overloading protector and multiple safety protection device, safe in operation
- Equipped air fan, automatic material charging
- Equipped ground dust arrester, can filter the powder efficiently, and the height can be adjusted according to the requirements
- Equipped high standardized safety system, safe and reliable in operation and maintenance
- The material charging angle is adjustable, it is convenient for conveying by belt

Model No: SR-3460
Sound Proof Crusher

Technical Parameters

Model		SR-2840	SR-3460
Power	kw	7.5	15
The power of material charging air fan	kw	2.2	3
Quantity of rotating blades		21	24
Fixed blades		2	4
Size		400x240	600x310
Rotate speed	r/min	720	620
Maxium grinding quantity()	kg/hr	400-600	600-800
Noise of grinding dB(A)	mm	80-85.6	80-85.6
Sieve size		Ø10	Ø12
Convey equipment of grinded material		Air fan	Air fan
Dust and powder seperating system		For selection	For selection
Amounted magnetic iron on charging inlet		For selection	For selection
