

SR-7687017

Electronic Automatic Glue Flat Hammering machine

Features:

1. The machine is improvement machine kind the automatic electronic glue machine and the upper folding machine type of improvement machine, the leather through the edge of this machine automatically on the edge of automatic hammer, saving labor, spreads the automatic hammer even, saves the manpower, excellent production quality, improve efficiency.
2. This machine uses the hot melt adhesive, may save the time of white glue to wait for drying with environmental protection request.
3. The numerical code adjusts the temperature of the hot glue, the glue flow, the adjustment is convenient, the instruction is accurate.
4. Automatic control glue through the photo resistance, the quantity of glue is stable、accurate.
5. This machine has a telescopic rod device and a new folding device, which is easy for employees to operate.
6. The new speed regulating mechanism, the speed velocity regulation is convenient.
7. Using the electronic high-speed servo motor, which has the least faults.

Technical Parameters

Model	SR 7687017
Voltage	220V
Power	1/2hp
Size	1300X550X1300mm
N.W	130kg
