

SR-7687018

Automatic Glue Spraying Machine

The main purpose: Suitable for shoes, handbags, wallets, bags, gift boxes and other industries spraying materials.

The scope of work: Effective recognition range: 800mmX600mm.

Apply glue: Glue, glue water, ,oily glue.

SR Visual numerical control glue spraying machine

The main purpose: Suitable for shoes, handbags, wallets, bags, gift boxes and other industries spraying materials.

The scope of work: Effective recognition range: 800mmX600mm.

Apply glue: Glue, glue water, ,oily glue.

The main advantage

1. Improve efficiency, save labor costs; coating speed, can save 5-8, effectively improve the production efficiency, reduce labor costs.
2. Save glue, reduce cost; CNC coating system is stable, the spray head can be used for debugging, users of different spray width, the width of the material along the injection of 3-15mm glue.
3. High efficiency, uniform spraying and thin, can save the glue around 20%, high efficiency.
4. Environmental protection and energy saving equipment, with the ventilation system, it can do suction treatment when gluing.

Technical Parameters:

Model	SR-7687018
Rated voltage	AC220V-50Hz
Rated power	2.9KW
Effective range of identification	800*600mm
Air pressure	0.5-0.6MPa
section dimensions	4600*2100*2000mm
