

SR-7687019

CNC automatic glue spraying Machine

**Features:**

1. Main purpose: Suitable for leather, cloth, etc. Precise trajectory of spray glue.
2. Walking track width: 3-20mm, The width of the whole spray is 200mm.
3. Numerical control touch screen control, the teaching way to edit graphics, can store 999 graphics.
4. Effective working range: 1600*1000mm also can be make customize.
5. Apply glue properties: Including the yellow glue and the white glue that can spray, such as glue.
6. Trait:
 - 1) Save manpower: high efficiency, can save manpower 2-4 people.
 - 2) Save the glue and High quality: Than traditional artificial glue save 40% - 60%, and the gluing evenly steady rarely marginal scattering.
 - 3) Environmental protection: Keep working environment clean.
7. New type of touch screen CNC system, servo high speed precision motor, robot special cable, precise automatic rubber coating valve.

Technical Parameters:

Model	SR-7687019
NAME	Technical parameter
Voltage/Power	220V/1KW
Air pressure	0.1-0.5MPa
Maximum speed	X/Y 800mm/s
Weight	240KG
Size	2210*1570*1350
