

**SR-7687016**

Fully Automatic gluing and folding machine

SR-7687016A automatic lady purse Edge gluing folding machine  
 SR-7687016B automatic lady purse Edge gluing folding machine

**Features:**

The following article points to introduce the machine function and features:

- \* the servo motor to replace the original common, make smooth speed up to 3000 / min.
- \* the machine control system with upgrade port, can enjoy our latest update feature.
- \* infrared induction speed control, a straight line can be changed according to kind of intelligent material, turn the optimum operating speed.
- \* 10 period of electronic control the quantity of glue, can adjust at will according to need the glue quantity size.
- The inside of \* mouth automatically play scissors.
- \* double-frequency touch in both English and Chinese color, level 3 page design.Key reaction rate in 0.1 seconds.
- \* automatically transform interval.
- \* electronic adjustment presser foot lifting capacity, to avoid the mechanical operation for the inconvenience.
- \* bend automatic promotion function, the lack of effective compensation in turn margin.
- \* automatic transmission reinforcing belt, through the perfect ratio of stepping motor and servo motor coordination, reinforcing with relaxed smooth stick above the main ingredient of the shop.

**Technical Parameters:**

MODEL NO.	SR-7687016A/B
Power	0.4kw
Heating Power:	0.7kw
General Power:	1.10kw
Power Supply Phase:	2-Phase
Voltage	220V
Frequency:	50Hz
Packaging Size	1330*700*1330(mm)
Machine size:	1200*550*1280(mm)
