

SR-7687023

Automatic Colouring Edge Machine

Main application: It is suitable for handbag, shoes, leather product and other interrelated industry colouring edge.

Working range: Minimum material 50mm*70mm, maximum material 250mm*380mm

Product Details

SR-7687023 Automatic planting edge machine

Main application: It is suitable for handbag, shoes, leather product and other interrelated industry colouring edge.

Working range: Minimum material 50mm*70mm, maximum material 250mm*380mm

Main Features

1. The planting edge process without manual operation, Lighten the workers' burden.
2. The planting edge clamp can be arbitrarily adjusted according to different sizes and shapes of materials, Within the range of work, you no need to replace the champ, it is convenient to use and easy to operate.
3. It can improve work efficiency, one person can operate 2-3 machine, the planting edge time is about 10s-15s.
4. It has Smooth running, High quality of colouring edge, adopt multi axis control system, use servo motor as power,which can make the planting edge process more stable and reliable, and the quality of colouring edge is higher, Reduce the number of times of colouring edge.
5. Four station planting edge in sequence, save the waiting time of planting edge; Equipment nonstop running, improve production efficiency, Can save labor 3-5 persons.
6. The Infrared rotating oven automatic drying, adopt intelligent temperature control, has good drying effect, Fast efficiency, Automatic take out the material, Lighten the workers' burden.

Technical Parameters:

Model	SR-7687023
Rated voltage	AC380V
Rated power	8.8KW
Minimum colouring edge range	50*70mm
Maximum colouring edge range	250*380mm
Planting edge time	10-15s
Air pressure	0.5-0.6MPa
planting edge section dimensions	2350*1790*2180mm
Front oven size	1850*1530*2180mm
Back oven size	1850*1530*2180mm
