

Model No: SR-9118TPU

Full auto Tpu Pouring Machine

Features:

Specially producing various single-color and multi-color TPU soles or other thin production.

Suitable for TPU thermo-moldable raw materials

Big mold-clamping pressure, easy make thin soles production.(finalthin:1mm)

The material quality be controlled by accurate electronic ruler. Pressure and flow of various motions be controlled by servo motor to ensure control material quality accurately.

Control system: German Siemens controller(PLC) and touchable screen man-machine interface, making operation convenient.

Hydraulic system: German Rexroth variable capacity pump, servo valves and solenoid directional control valves, control motions accurately..

Model No: SR-9118TPU
Full auto Tpu Pouring Machine

Technical Parameters

Model No	SR-9118TPU
Raw Material	TPU
Stations	18
Screw Diameter	φ60
Max. Injection Capacity	650cm ³ /shot
Mold Dimension	340 x 180 x 60mm ³
Total Power	24.7kw
Oil Tank Capacity	450L
Machine Dimension (LxWxH)	5988x2746x2143m ³
Machine Weight	11.2T
Plasticizing Capacity	60mm
Mold Clamping Force	210~260mm
Output	220pair/hour
