

## SR-LT-7036 WHOLE SHOES FLEXING TESTER

### TECHNICAL PARAMETER

Model No.	SR-LT-7036
Power	AC220V 50HZ
Bending angle	0°~90°(adjustable)
Speed	0 ~ 150 cpm
Specimen number	4 Shoes
Counter hair	6 Electronic LCD

### EQUIPMENT SUMMARY

This machine specialized testing of sports shoes, casual shoes, work shoes, shoe, after a long time, given frequency, after setting the bending angle of the continuous back and forth, to assess their folding properties or view their degree of cracking.

The machine has many features can be described as exhaustive, in addition to rational design, model beautiful, specimen clamp, remove easily, the shaft made of special carbon steel, durable, with no gaps way transmission belt Xing shaft closely, the wear and noise to a minimum, with toothed belt makes the speed even more accurate and stable interest, coupled with offsetting the use of vibration and shock tripod design, the achievements of the native beautiful, strong, stable and durable, low wear, low noise, simple operation, easy maintenance and many other features, acrylic shield is to protect the safe operation of the operator, in line with SATRATM92 technical basis.
